APPRENTICES**

WHAT IS PUBLIC AND PRODUCTS LIABILITY INSURANCE?

Public and Products Liability Insurance is one of the most important forms of financial protection for many Australian businesses.

As a business owner you are exposed to many different risks. Some of the more prevalent risks are those that involve damage to third party property or personal injury through your actions.

Many claims involving property damage or personal injury caused through your business activities will be covered by Public Liability while Products Liability will provide cover for third party property damage or bodily injury arising out of a defective product manufactured (or been deemed to have been manufactured) through your business activities.
